PROFESSIONAL SUMMARY

Infrastructure and cloud operations engineer with over one year at TVS Supply Chain Solutions, progressing from Technical Support Engineer (L1) to Infrastructure AIOps Engineer. Administers AWS EC2, EKS and VPC across multiple accounts; supports Linux servers, Nutanix and Windows endpoints; and troubleshoots VPN, LAN/Wi-Fi, email and account access. Builds Terraform infrastructure as code (IaC), Azure DevOps CI/CD workflows, Python API services and Bash automation for health checks and incident analysis, with human approval before remediation.

CORE TECHNICAL SKILLS

- **Cloud & Architecture:** AWS EC2/EKS/VPC, Azure, Nutanix, Proxmox, infrastructure architecture, system design
- **Systems & ITSM:** Linux/Ubuntu, Windows Server, Active Directory (AD), endpoints, ServiceNow, stakeholder management
- **Networking & Access:** VPC, VPN, Tailscale mesh VPN, LAN/Wi-Fi, Nginx, SFTP, Samba NAS, ARCON
- **DevOps & Scripting:** Terraform, Ansible, Docker/Kubernetes, Azure DevOps CI/CD, Jenkins, n8n, Git, Python/Bash, APIs
- **Backup, Security & Monitoring:** Veeam Backup, N2WS, Wazuh, Prometheus, Grafana, Datadog, endpoint protection

PROFESSIONAL EXPERIENCE

Infrastructure AIOps Engineer Apr 2026 – Present
TVS Supply Chain Solutions | Chennai, India

- Administer EC2, EKS and VPC resources across multiple AWS accounts; deploy containerised workloads to production EKS and support Docker/Kubernetes operations.
- Maintain Linux servers in cloud and on-premise environments, support Nutanix virtualisation and monitor service availability.
- Provision infrastructure with Terraform (IaC); coordinate approved server access, VPC connectivity, office VPN and FTP setup.
- Develop Python API services and Bash scripts for health checks, incident analysis, recurring tasks and reporting, with human approval before remediation.
- Manage the Azure DevOps organisation and CI/CD workflows; maintain the Server-Management-System repository for centralised server administration.

Technical Support Engineer (L1) Jul 2025 – Apr 2026
TVS Supply Chain Solutions | Chennai, India

- Troubleshot Windows endpoint hardware/software and corporate email issues using documented support runbooks.
- Investigated user account-access issues and supported approved access requests for internal systems.
- Diagnosed VPN and LAN/Wi-Fi connectivity problems affecting access to internal services.
- Fulfilled approved server-access and FTP requests and investigated user-to-server connectivity issues.
- Monitored Linux servers, the on-premise VM cluster and service availability; supported endpoint protection activities.
- Resolved YSoft SafeQ print-queue, driver and network issues during setup of the 8-printer secure printing service.

RELEVANT PROJECTS

Enterprise CloudOps Automation Platform | TVS SCS 2026 – Present

- Developing resource discovery across multi-account AWS, Azure and Nutanix, plus Linux health checks, runbooks and operational reporting.
- Connecting Python API services and Docker workloads with n8n, Celery and Temporal for operations workflow orchestration.
- Designing AWS Bedrock-assisted incident analysis that presents findings for human review before remediation.

Self-Hosted Infrastructure Lab | Personal Project

- Built a Proxmox home server and Samba NAS; connected lab devices through a Tailscale mesh VPN for private remote access.
- Self-hosted Jenkins and n8n to practise CI/CD and workflow automation in the lab.

AWS Infrastructure with Terraform | Personal Project GitHub

- Authored Terraform modules for VPC, EKS, RDS, S3, ALB and IAM in a reusable infrastructure repository.
- Modelled public, private and database subnets across availability zones as a multi-AZ network design; defined EKS managed node groups in code.
- Defined S3 versioning, encryption and public-access blocks in code as part of the storage module.

EDUCATION

Bachelor of Computer Applications (BCA) 2021 – 2024
Manonmaniam Sundaranar University | GPA: 6.8/10
